Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Albisser et al (US 4,245,634) as modified by McNally et al (US 4,080,966), in further view of Hiroi (5,745,362).

Albisser et al disclose in the abstract, lines 1-5 a method of obtaining the current blood glucose concentration of a user, generating commands through the use of a controller, and infusing a liquid through a catheter connected to the body of a user based on the controller commands.

Albisser et al disclose the claimed invention except for the controller being a PID controller. McNally et al teaches that it is known to use a PID controller as set forth in column 4, lines 6-18 to provide a closed loop system with a more accurate control system. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the method as taught by Albisser et al with a PID controller as taught by McNally et al, since such a modification would provide the method with a more accurate control system.

Albisser et al as modified by McNally disclose the claimed invention except for the controller being a bilinear PID controller. Hiroi et al teach that it is known to use a bilinear PID controller as set forth in column 3, lines 3-21 to provide a more accurate control system. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the method of as taught by Albisser et al as modified by McNally with a bilinear PID controller as taught by Hiroi et al, since such a modification would provide the method with a more accurate control system.

Allowable Subject Matter

Claims 33 and 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
